Summary

Passionate Backend Developer with solid experience building robust APIs, scalable backend systems, and secure applications. Skilled in Python (FastAPI, Django, Flask) with strong knowledge of databases (PostgreSQL, MySQL, SQLite) and authentication/authorization systems. Experienced in role-based and permission-based access control (RBAC & PBAC), API security, and system design. Actively exploring Blockchain, Web3, and cybersecurity development.

Work Experience

Backend Developer | Kigali, Rwanda

- Designed and deployed RESTful APIs using Python (FastAPI, Django).
- Optimized SQL queries and schemas, reducing response times by 20%.
- Implemented secure authentication (JWT, OAuth2) and role/permission-based access systems.
- Integrated third-party APIs and improved backend efficiency.
- Automated testing with Pytest, cutting bugs by 15%.
- Collaborated with frontend developers (Vue.js, Bootstrap).
- Maintained GitHub repositories with version control and code reviews.

Junior Backend Developer | Kigali, Rwanda

- Assisted in developing CRM/ERP-like backend systems with Python (Flask, Django).
- Built modules for user management, product inventory, and sales tracking.
- Debugged backend issues and improved app reliability.
- Learned and applied ORMs (Django ORM, SQLAlchemy) and database migration tools.

Projects

Ticketing System with Role-Based Dashboard (FastAPI + PostgreSQL + Vue)

- Built a support ticketing system with roles: User, Support Agent, Manager, Admin.
- Designed RESTful API and integrated with Vue frontend dashboard.
- Implemented PBAC for secure endpoints.

Inventory Management System API (FastAPI + PostgreSQL)

- Designed RESTful endpoints for inventory tracking.
- Implemented JWT authentication, error handling, and role-based access.

Nutrition Care Model API (Flask + SQLite)

- Built personalized meal recommendation model with API access.
- Allowed third-party apps to integrate meal suggestions.

Cybersecurity Tools & Scripts (Python)

- Created utilities like password generators, regex-based email validators, PDF unlocker scripts, and fuzzy matching tools.
- Exploring penetration testing automation and network programming in Python.

Technical Skills

- Languages: Python, SQL, JavaScript (basic)
- Frameworks: FastAPI, Django, Flask, Bootstrap, Vue.js (basic)
- Databases: PostgreSQL, MySQL, SQLite
- Tools: Git, GitHub, Postman, Linux CLI, Pip
- Testing: Pytest, Unit & Integration Testing
- Concepts: REST APIs, OOP, RBAC & PBAC, Microservices, ORM, Cybersecurity

Education

BSc. in Information Technology | University of Rwanda, Kigali (2024 – 2028)

Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Application Development, Cybersecurity, Data Analysis
